

## Mould Control Pack

### Code 382

#### Mould Control Pack

Problems of mould growth caused by dampness and condensation are not always easily solved. Extra ventilation and the proper use of heating are two measures commonly recommended but rarely carried out by householders and occupiers reluctant to let cold air into their homes.

#### The cost-effective solution

Whether or not condensation continues to occur after making recommendations for heating and ventilation is largely an irrelevant point for most people. What they see and what they want rid of is the BLACK MOULD. The best method of treatment is to clean and sterilise affected surfaces with a fungicidal wash and then paint using a fungicidal coating. A Biokil Crown Mould Control Pack allows the black mould to be treated as simply as normal decoration and as long as the painted surfaces are kept clean the black mould will not return.

The Pack is a safe, simple and economical method of addressing black mould problems.

#### The Pack

The Biokil Crown Mould Control Pack contains Mould Wash Concentrate and two pots of Mould Eradication Additive for stirring into emulsion paint or wallpaper paste. The wash and additive are easy and safe to use and will provide effective protection against mould growth.

#### Pack Contents:

250 ml Biokil Crown Mould Wash Concentrate (makes 5 litres of wash) and

2 x 50 g Biokil Crown Mould Eradication Additive (one pot per 2.5 litres of paint or paper paste)

#### How to use

Use of the pack is a simple two-stage process:

1. Wash affected areas with Mould Wash Concentrate once diluted to remove and kill existing mould spores.
2. Add the Mould Eradication Additive to the chosen emulsion paint or wallpaper paste and stir in thoroughly. Apply paint or paste as normal.

#### Coverage

The pack provides enough materials to treat up to 40m<sup>2</sup> of walls and ceilings, adequate for most mould growth outbreaks. For larger or very severe outbreaks Biokil Crown ready mixed paints such as **Anti-mould Paint** and **Anti-condensation Coating** are available.

Biokil Crown also manufactures other Biokil Crown fungicidal products including special masonry coatings. For further details of these products and the Mould Control Pack contact our office and ask for your local agent.
