

WOODZONE MASONRY BIOCIDES

Code WZ003 160gm (Makes 25 Litres)

Woodzone Masonry Biocide is a fungicide based on 3-Iodo-2-Propynyl-Butyl-Carbanate. It is supplied in a small plastic container. It is designed to eradicate the Dry Rot fungus from masonry & soil by low-pressure non-atomised spray to refusal on the affected surfaces & by irrigation via holes drilled into walls or floors.

Benefits of Woodzone

- Super concentrate (160gms makes 25 litres)
- Good penetration
- Fully solvent free technology
- No VOC's
- Significant reduction in plastic & paper waste
- Virtually no odour
- Non-flammable

Biokil Crown Chemicals formulations are all cleared under the Government's Pesticide Safety Precaution scheme & under the Control of Pesticide Regulations 1986, for use as directed & carries the HSE Approval No 9177

Typical Applications for Woodzone

- A surface biocide for use against Dry Rot & Wet Rot on masonry & sub-floors in buildings

Preparation & Application

Thoroughly clean all wall areas & oversites to remove any surface fungal growth or strands, using a stiff broom or wire brush.

Dilute the **Woodzone Masonry Biocide** 160gm container with 25 litres of water.

Sterilise all exposed wall areas with 2 coats of **Woodzone Masonry Biocide** to the joints, followed by an overall surface application, using a brush or coarse spray. (**Do not** use atomiser sprays). Oversites should be thoroughly sprayed until saturated with fluid. However, where severe attacks of dry rot in masonry have occurred we recommend the following traditional irrigation treatment:

- The wall should be drilled deeply (two-thirds depth) at 230mm (9 inch) staggered centres at a downward angle to ensure full penetration of the fluid.

N.B. Irrigation should only be undertaken when there is demonstrable need for deep penetration of fluid.

Coverage

Coarse Spray 1 litre to 2-5m²
Irrigation 2.5 litres per m² for 230mm (9 inch)
brickwork or 10 litres per m³

Contents

3-Iodo-2-Propynyl-n-Butyl-Cararnate 15.30%w/w

Safety

To avoid risks to man & the environment, comply with the instructions for use.

- The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work
- Avoid excessive contamination of overalls
- Do not contaminate foodstuffs, eating utensils or food contact surfaces.
- This material & its container must be disposed of in a safe way – do not empty into drains – do not contaminate ground, waterbodies or watercourses with chemicals or used containers.
- Avoid contact with skin
- Avoid contact with eyes (in case of contact with eyes, rinse immediately with plenty of water & seek medical advice)
- Remove or cover all fish tanks & bowls before application
- Keep away from treated surfaces until dry
- Cover all storage tanks before application
- Wash hands & exposed skin before meals & after use
- If swallowed, seek medical advice immediately & show this container or label

Read the product label & Material Safety Data Sheet (MSDS) for full safety information.

Packaging

160gm in plastic container

Storage

- Keep in a safe place
- Keep out of reach of children
- Should be kept in a cool dry place
- Shelf Life; Concentrate – up to 4 years, Diluted product – up to 6 months
