

Hello World!

This is an example file to demonstrate Bitstamped.io

This file could have been anything, a business plan, a photograph, a diagram, song lyrics, details of your next big mobile app, an ebook, the secret recipe to Coca-cola, or something even more amazing that you wanted to prove you thought of first.

But this is just a text file, whose SHA256 checksum is now forever stored on the Blockchain.

We hope you like Bitstamped.io

Thanks for reading,

Ink Factory
