

Bkool Go, the new smart trainer from Bkool at an unbeatable price

Same quality, extremely realistic sensations, all with an unbeatable price

Bkool's new smart trainer, Bkool Go, is here. The leading smart trainer company is launching a new model that stands out for its quality and low price.

Bkool Go is a trainer designed not only to meet the needs of most cycling fans, but to adapt to all kinds of budgets too. Capable of simulating gradients of up to 8% thanks to its 800W power, this new trainer can get you feeling like you're on the road for just €345.99. It also includes a three-month subscription to Bkool's premium cycling simulator.

Silent, foldable, light and weighing under 10 kg, the new [Bkool Go](#) is 100% compatible with all the features of Bkool's cycling simulator. Regardless of what system or bike you use, Bkool Go can connect to ANT+ and Bluetooth Smart devices and it's compatible with all kinds of bikes, including MTB. Plus, like the company's previous models, it's easy to set up and put away, designed so that users only have to worry about the kind of workout they want to do each day.

You'll feel the grueling climb up Alpe D'Huez in your legs and the inertia on the way down, you can take part in awesome velodrome events and feel the draft whenever you slip behind a rider, or do professional workouts that use power zones automatically, all from the comfort of home at a great price.

About Bkool ®

[Bkool](#) is a technology company that creates interactive and innovative solutions for sports and videogaming. In the field of cycling, it has developed the most advanced trainer and simulator. The simulator lets cyclists ride any route in the world in 3D alongside other cyclists in different places connected in real time. With the simulator, users experience the same sensations they would have on the road. Its 3D World technology simulates any route in the world in 3D and recreates the actual elevation of the terrain and the details in the landscape. Its 3D Real Weather ™ technology recreates the weather in real time on any route. Bkool is available in seven languages, including Chinese and Japanese, and distributes its products worldwide.
