

Full Stack Developer

Brand42 London, UK - Permanent - Full Time

Job Description

Brand42 is an award-winning agency with a diverse range of clients including the BBCW, VisitBritain, MailOnline, Bayer, CNN, Johnnie Walker and Smirnoff.

We're looking for an ambitious and experienced Mid-Senior Full Stack Developer to join our development team in our London studio. Being part of a collaborative creative agency you will be involved in all stages of a project and have the opportunity to contribute throughout and help us make the right technical decisions. We're technology agnostic so we're not tied to a particular stack though we love doing things the right way, and are always looking for new technologies which can deliver outstanding future proof results for our clients.

You'll be responsible for delivering exceptional coded websites, campaign sites and web apps for our clients. We're looking for a developer who's able to learn new technologies quickly, stay ahead of trends, can troubleshoot problems, and have an excellent understanding of best practices and keep a keen eye on future trends.

You'll be capable of mentoring and inspiring the development team. This is a mid-senior role and while you don't need any fancy qualifications, relevant professional experience is a must.

Skills & Requirements

- 2+ years' relevant experience.
- Comfortable working HTML, CSS/SASS and Vanilla Javascript.
- Proficient in at least one server side technology such as NodeJs, PHP or similar.
- Comfortable working with databases such as MongoDB and MySQL.
- Have some server set up experience working with AWS or similar.
- You've worked in a modern front end framework such as Angular or React using build systems such as Grunt, Gulp or Webpack.
- Can build against 3rd party APIs.
- Experience of working with Git.
- Knowledge of unit testing, preferably Jasmine, and importance of TDD.
- Good understanding of cross browser development and responsive-design.

In addition to the above, here are some of the nice to haves:

- Experience working in an agency and client facing environment.
- Involvement in Open Source projects.
- Practical knowledge of OOP in any language.
- Photoshop/sketch experience is ideal but not essential.
- A great eye for detail and drive to market leading solutions.
- Building good team morale to help foster the production of exceptional work.
- Have been in a client-facing role and have project experience in working with teams as well as under your own initiative.
- This is an exciting opportunity for the right candidate to shape and grow the development team at Brand42. This is an exciting opportunity for the right candidate to shape and grow the development team at Brand42.
