

Support for Ronald medical expenses

Ronald, one of our most dedicated and long serving volunteers in the Unit, involved in caring for patients and families with life limiting illnesses was diagnosed just before his wedding at last year with skin cancer that had spread locally. He has received surgical and chemotherapy treatments and has now started radiotherapy.

Ronald, Christine & team on their wedding day September 2019!

We are seeking ongoing financial support from all friends and well-wishers to enable us to cover Ronald's medical expenses including; investigations and medicines which are not readily available at the Uganda Cancer Institute and to help him go through this challenging journey. We are delighted his core chemotherapy costs are covered.

He is one of many to be affected by the COVID19 pandemic and is struggling to access his daily radiotherapy with a lock down in Uganda affecting all transport options. At present he is attempting to cycle at least 45 minutes each way on a borrowed bicycle with several hours rest in between.

Ronald and Christine are faithful, servant hearted people who respond to each crisis with a deep sense of trust and appreciation for the 'family support'

Some of the costs have been covered through your support but there are ongoing costs that we need to meet. We have raised £1000 but still have £1500 to go and any amount will make a difference!

For contributions please contact; Dr. Mhoira Leng on dr@mhoira.net for UK contribution or send to PcERC on the details below with a confirmatory email to g.kivimbu@gmail.com
