## Fast-Fit Disposable Curtain

### Marlux Fast-Fit Antibacterial Disposable Curtains featuring built-in Microban technology for added protection

Marlux Medical Limited is the leading UK based manufacturer and supplier of disposable privacy curtains to NHS and private healthcare.

3G Silver™ antibacterial technology from Microban is built into the Marlux curtains at the point of manufacture to provide a valuable and effective tool to aid the fight in infection control.

- Manufactured from high quality, durable and recyclable non-woven polypropylene fabric and incorporating a unique welded and stackable glider design
- Three standard widths are available: 7.2m, 3.6m and 1.8m all with a 1950mm standard drop
- 4 standard stock colours are available for immediate supply together with a wide range of bespoke colours via our custom made service
- Marlux curtains are lightweight to aid health and safety requirements
- Unique anti-peel label with date last changed
- Fire retardant to BS 5867-2: 2008 type C
- Marlux is a BSi certified company to ISO 9001:2008

### Microban 3G Silver™

The Microban portfolio of antibacterial technologies includes a new line of third generation silver-based technologies. These "3G" silver technologies offer efficiencies that will help to keep products more hygienic by working continuously to prevent the growth of bacteria.

- Provides continuous antibacterial efficacy
- Inorganic and highly temperature stable
- Does not contain silver nano-particles - Microban antibacterial technology is not based on nano-technology

Reassuring patients of privacy and hygiene protection.

Patent pending.

## About Microban

Microban is the global leader in built-in antibacterial product protection, engineering durable antibacterial solutions for consumer, industrial and medical products around the world.

## Microban “built-in” antibacterial technology

Marlux Medical has worked in partnership with Microban to incorporate 3G Silver™ antibacterial technology into the Marlux disposable curtain range.

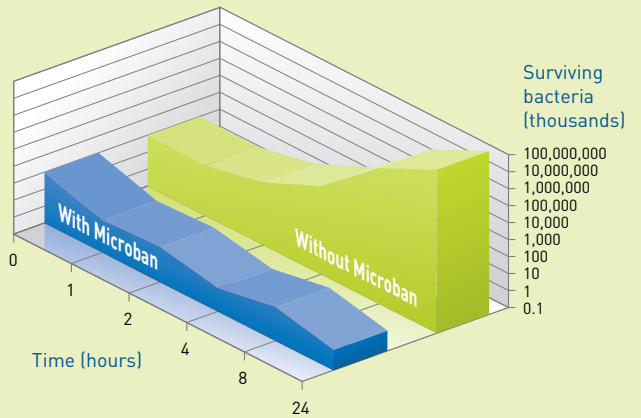

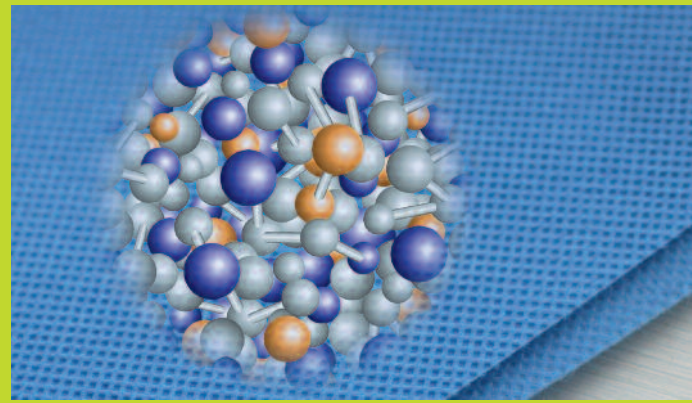

Microban technology provides an additional level of protection against bacterial growth and serves to underpin existing hygiene measures within healthcare facilities.

- The Marlux curtain range can now provide you with built-in Microban antibacterial protection
- Microban antibacterial technology prevents the growth and transfer of bacteria
- Microban antibacterial protection kills up to 99.99% of harmful bacteria on the surface of the curtain

## How does ‘built-in’ help?

Microban 3G Silver™ technology is built into the polymer structure of the non-woven fabric during production:

- Not applied as a secondary process, the antibacterial protection cannot wear or wash off during use
- Provides effective protection against bacteria twenty four hours of the day for the full useful life of the curtain

## Marlux Enviro Bag

The simple and safe solution for the collection, recycling and disposal of Marlux disposable cubicle curtains.
