# FM

## TV FLOOR MOUNT

Every aspect of the FM has been crafted to give the end user a minimalist and elegant display mounting solution. Cables can be routed through the central column to maintain a clean aesthetic. The sturdy hand spun stainless steel base ensures the FM remains rock steady when rotating the display up to 30° in either direction. The FM is fitted with a VESA 400 mount as standard, but VESA 200 and 300 mounts are available for smaller screen sizes if necessary.

The FM is also available with a Matte black painted base (FM-BLK) or can be finished with a custom colour (FM-BESPOKE) to blend seamlessly within a space.
