### DESIGN HIGHLIGHTS

A premium quality enclosure to allow in-wall wiring terminations for an AV rack installation.

Enclosure fits in a standard 14" wide (16" centres) single stud bay and is under 4" deep in wall.

# RTE-4

## RACK TERMINATION ENCLOSURE

### DESIGN HIGHLIGHTS

#### REMovable CABLE CONDUIT SECTION

Entire Cable management conduit section is easily removed with a simple hook on-off feature.

This allows the rack wiring to remain enclosure and secure as part of the AV rack when delivered to site. This can be easily fitted to the RTE enclosure and connection made quickly and efficiently.

#### OPTIONAL GUARD PLATES

Guard plates can be added after installation is complete to ensure external connections are not tampered with or accidentally damaged.

Connector hatches can still be opened when guards are in place.

Product Order Code: RTE-GP
