

Factory preset 0-0-0-0

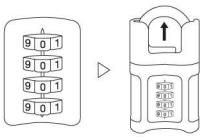

Usage

To open: the shackle can be released when correct combination is dialed. The factory preset combination is 0-0-0-0.

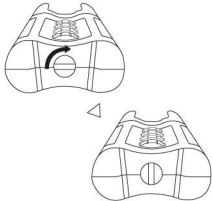

To lock: rotate the shackle back to its original position, press it down to the shackle pit and scramble the dials to lock the padlock.

Set your own combination

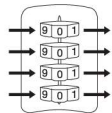

1. Open the Padlock.

2. Rotate the slot at the bottom of the padlock 90° clockwise so that it is perpendicular to the part-line.

3. Set your own combination and memorise it.

4. Rotate the slot back to its original position and the combination is set.
