

CL400

Front and Back Plates

Front and back plates only for use with existing mortice latch or lock. The existing lock must have a fixing hole 22mm (7/8") below the follower (spindle).

CL410

Mortice Latch

Medium-duty tubular mortice latch locks. Stainless steel latchbolt head with 'anti-shim' deadlocking plunger, 8mm (5/16") follower. The outside lever handle will retract the latch after a correct code is entered. The spring loaded latchbolt will lock automatically when the door is closed.

CL420

Mortice Lock

Euro profile mortice sash lock with deadbolt and latchbolt. Complete with double cylinder to control deadbolt and to retract latchbolt. With the deadbolt locked it denies access to a code user. The split follower enables the inside lever to retract the deadbolt and latch to prevent accidental lock in when the deadbolt is thrown. Supplied with double Euro profile cylinders with three keys. The key will open the door for management functions.

Code Change Method

Requires removal of lock from door. Locks are supplied with a random code commencing with the 'C' clear button. To change the code after fitting, the lock must first be removed from the door. The code is non sequential, i.e. the code can be entered in any preferred order (e.g. 1234 can be 4321 or 1342). A total of 8,191 different codes are available - any of which can be entered in any order.

OPTIONS

Latch Options:

60mm (2 3/8") backset requires 25mm (1") hole, 82mm (3 1/4") deep.
70mm (2 3/4") backset requires 25mm (1") hole, 92mm (3 5/8") deep.

Back to Back Option (BB):

Two coded plates for installation on both sides of the door. Provides coded access in both directions.

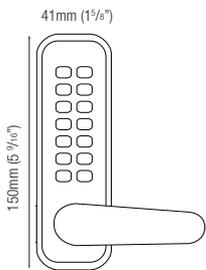

Code Free Option:

The outside lever will retract the latchbolt without using a code.

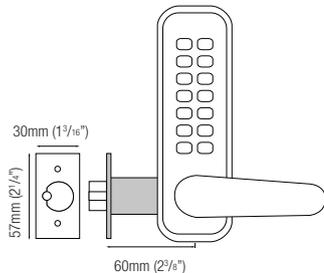

For further product model options see price list.
