

New Key Programming Software for Suzuki® 2016 Vehicles ADS233 - Code D746567AD

January 2017

Advanced Diagnostics is pleased to announce the release of Suzuki® 2016 (ADS233) key programming software for a range of Suzuki® vehicles worldwide from 2010 onwards.

What does the software do?

ADS233 will program bladed and proximity keys for various models of Suzuki® cars. A pincode is required to program keys and the software will bypass the pincode during the procedure when the Smart Dongle is used. ADS192 has been significantly enhanced and now supports various older model Suzuki® vehicles for pincode reading.

Please see application list below for vehicle coverage or Info Quest.

What other software and products will I need?

MVP Pro users: one token will be deducted for key programming.

Contact your distributor to buy ADS233 software now.
