## ADC219 Cable - Code D747038AD
VAG® Instrument Cluster Reset Cable
For all keys lost situation - on selected VAG® vehicles

May 2016

Probe and program a new VAG® key when all is lost.

Advanced Diagnostics are pleased to announce the release of the new ADC219 cable which is designed to be used with ADS230 software and Smart Dongle.

What does the cable do?

ADC219 cable is developed specifically for use on selected VAG® vehicles when all vehicle keys have been lost.

The cable has been designed for advanced auto locksmiths who have a good working technical knowledge of removing, disassembling and re-fitting instrument clusters from vehicles.

The cable is used to probe a specific pin located on the PCB board on the reverse side of the instrument cluster in order to put the vehicle into service mode, before a working key can be generated.

A user guide and images containing the probe points on the various instrument clusters supported will be available on the AD website and Info Quest.

ADS230 Software - Code D747039AD
VAG® Instrument Cluster Reset Software
For all keys lost situation - on selected VAG® vehicles

What does the software do?

ADS230 VAG® software is designed specifically to be used with the ADC219 cable and Smart Dongle to put the instrument cluster into service mode - for use on selected VAG® vehicles when all keys are lost. Once the cluster is in service mode, keys can then be programmed using ADS219 or ADS250 (South America).

Tools required for VAG® all keys lost:

- AD100 Pro or MVP Pro
- ADS230 software
- Smart Dongle
- ADC219 adapter cable
- Torx T20 screwdriver
- Torx T10 screwdriver
- Flat blade screwdriver
- T33 (ID48) transponder
- Remote / key blade

OFFER DETAILS

Cable	ADC250 or ADC251 + ADC219
Dongle	Smart Dongle
Software category	C
Other software required	ADS219 or ADS250 (South America)
Smart card	Smart Dongle

Contact your distributor to buy ADC219 cable and ADS230 software now.

Škoda® Yeti (5L) 2010 to 2013	ADC250 or ADC251 + ADC219	Smart Dongle	⊗

Notes:

Due to the number of cluster variations fitted to VAG® group vehicles, AD cannot guarantee 100% coverage for ADC219 / ADS230 in a lost key situation for the vehicles listed in the application list.

The cable has been designed for advanced auto locksmiths who have a good working technical knowledge of removing, disassembling and re-fitting instrument clusters from vehicles.

Important note:

To prevent damage to the Smart Dongle, ensure that the ignition is turned off when connecting the tester to the vehicle.

Please visit the Advanced Diagnostics website to see the training video procedure.
