

## WINDOW RESTRICTOR PREMIUM

**According to RoSPA, around 4,000 injuries occur from falls from open windows each year, Cardea Solutions' Premium Window Restrictor is the solution to accident prevention in schools, care homes and hospitals.**

- The Premium Window Restrictor should be fitted to an opening of 10cm in line with HSE guidelines or 8.9cm in line with child-proof guidelines.
- The window restrictor can be used on all kinds of windows, including PVC, aluminium, wooden and metal profiles - and even doors.
- The window restrictor can be installed in just 10 minutes in most locations, allowing you to provide safety and security on your premises quickly and affordably.
- The Premium Window Restrictor is provided with a key, which means that the restrictor cable cannot be unlocked or removed without the key holder's knowledge.

### APPLICATION

- Suitable for healthcare establishments, schools, nurseries and hotels - wherever there is a risk of accidental or intentional falls from windows above ground level.
- Available in white, chrome or brown finish to suit all types of window frames.

### SPECIFICATION

- Tested to a force of 550kg, the window restrictor is strong and hard wearing.
- Tested to BS EN 14351-1 and BS EN 13126-5 standards.
- The fixing plate is manufactured from a tough zinc alloy, while 20cm the cable is a stainless steel wire coated in plastic.
- Free 5 year manufacturer's guarantee with every Premium Window Restrictor.
