

WINDOW RESTRICTOR ESSENTIAL

According to RoSPA, around 4,000 injuries occur from falls from open windows each year. The Essential Window Restrictor offers a simple and functional solution to this type of common accident.

- The Essential Window Restrictor should be fitted to an opening of 10cm in line with HSE guidelines or 8.9cm in line with child-proof guidelines.
- The Essential restrictor can be used on all kinds of windows, including PVC, aluminium, wooden and metal profiles - and even doors.
- The restrictor is provided with two keys, which means that the restrictor cable cannot be unlocked or removed without the key holder's knowledge.
- The lock cannot be easily compromised by insertion of blade or other sharp implements e.g. a screwdriver or scissors.

APPLICATION

- Suitable wherever there is a risk of accidental or intentional falls from high windows.
- Available in white or black finishes to suit all types of window frames.

SPECIFICATION

- A cable length of 18cm.
- Stainless steel wire in a plastic coating.
- Supplied with 2 keys.
- 1 Year Manufacturers Warranty.
