

WINDOW RESTRICTOR **FIXED**

The Cardea Fixed Window Restrictor is designed to prevent falls from windows by offering a lockless design to prevent tampering.

- In line with HSE guidelines, the Fixed Window Restrictor should be fitted to an opening of 10cm in line with HSE Guidelines or 8.9cm in line with child-proof guidelines.
- The Fixed Window Restrictor is a keyless design which eliminates the risk of a lock being tampered with..
- Anti-Tamper screws to prevent the restrictor from being easily compromised.

APPLICATION

- Suitable for healthcare establishments, schools, nurseries and hotels - wherever there is a risk of accidental or intentional falls from high windows.
- Suitable for all types of windows including PVC, aluminium, metal and wooden profiles.

SPECIFICATION

- A cable length of 20cm.
- Stainless steel wire in a plastic coating.
- Fixing Plate made from zinc alloy.
- Supplied with anti-tamper screws which cannot be removed without the use of special tools.
