

Agrippa acoustic door closer

The Agrippa fire door closer 'listens and learns' the sound of your specific fire alarm, releasing the door in the event of a fire.

How does it work?

1

The Agrippa door closer is battery powered and wire-free. The device is installed at the top of the door.

2

Using 'listen and learn' technology, the device learns the sound of the building's fire alarm.

3

The Agrippa door closer recognises the fire alarm and automatically releases the door, protecting the building.

Features and benefits

- Eases access and improves ventilation
- Makes heavy fire doors light and easy to move
- Battery powered and wire-free, no disruption to building
- Easy installation
- Reduces false activations through 'listen and learn' technology
- Free-swing mode feature allowing the door to be held open in any position
- 12 month warranty

Technical specification

- Battery operated (Includes two C-cell batteries)
- L-463mm x W-71mm x D-76mm
- Holding angle 65-105 degrees
- Approved to EN1155 and EN1154
- CE marked through the Construction Products Regulation
- EMC approved
