- Twin chamber design
- Use with cone adaptor or in conjunction with radiator caps
- Includes cone adaptor, upper and lower chamber, radiator cap, 250ml detector fluid, refillable bottle and rubber bulb
- Supplied in a sturdy plastic storage case

DESCRIPTION

Block or combustion leak tester for determining if CO2 is present in a vehicle's cooling system. CO2 in the cooling system can indicate a head gasket leak, cracked block or a warped head, etc. Simple to operate by adding blue detector fluid to the tester and placing tester onto the radiator; air is drawn through the liquid which will change colour to yellow if CO2 is present. Can be used in conjunction with a cone adaptor or an adaptor within the Draper Radiator Pressure Test Kit (Stock Nos. 14455 and 23420). Supplied with detector fluid.
