- Designed for light to medium-duty work and delivers rapid stock removal from a wide variety of surfaces
- Hardened dipped brassed steel wire
- Strong construction with crimping action
- Ideal for smaller areas that might otherwise be hard to reach
- Fitted with a non-slip 6.35mm hex shank
- Compatible with most drill drivers and drills with a 13mm chuck

## DESCRIPTION

This wire end brush is designed for light to medium-duty work and delivers rapid stock removal from a wide variety of surfaces. The bristles are made from hardened dipped brassed steel wire, which gives a high level of durability and resistance to oxidation. The brush is strong enough to provide reliable performance, and the crimping is flexible to tackle recessed areas and irregular surfaces. Its size makes it highly suitable for smaller areas that might otherwise be hard to reach, such as removing rust from water pipes. Fitted with a non-slip 6.35mm hex shank. Compatible with most drill drivers and drills with a 13mm chuck.

Conforms to EN1083-1 and EN1083-2

## CONTENTS

1 x Brassed Steel Crimped Wire End Brush, 25mm
