

5A 6/12V Smart Battery Charger LCD

BRAND

WARRANTY

FEATURES

- Supports both 6V and 12V lead-acid battery charging
- Suitable for flooded, maintenance-free, AGM and gel batteries
- Smart charging system helps optimise battery performance and lifespan
- LCD display provides clear charging and status information
- Maximum 5A charging output suitable for batteries from 4Ah to 150Ah
- Reverse polarity protection improves user safety during connection
- Short-circuit protection helps prevent charger and battery damage
- Charging start voltage from 1.5V supports recovery of low-voltage batteries
- Operates in temperatures from -20°C to 40°C for reliable indoor and outdoor use
- Compact ABS housing improves durability and portability

DESCRIPTION

5A 6/12V smart battery charger with LCD display designed for charging and maintaining automotive and leisure batteries safely and efficiently. Ideal for vehicle owners, mechanics, and garages, it features a smart charging system that helps optimise battery performance and lifespan.

CE, EMC, LVD, GS and RoHS compliant

CONTENTS

1 x 5A 6/12V Smart Battery Charger LCD
1 x Alligator Clamp

SPECIFICATIONS

Nominal voltage: 220V-240V

Battery current: Max. 5Amp

Battery Voltage: 6V/12V

Charging Start Voltage: 1.5V

Battery Capacity: 4-150Ah, +€

Output cable length : 1.5m

Input Cable Length 1.5m with BS plug

Display: LCD

Surrounding Temperature -20°C to 40°C

Protection class IP54
