- Detachable screen with image capture, record and playback
- 6 super bright LED lights with brightness adjustment to help illuminate even the darkest area
- 5.5mm camera with 1m of flexible, semi-rigid cable
- Helps to inspect pipework, sewage and mechanical equipment
- Stored in a padded plastic storage case

DESCRIPTION

This rechargeable pistol grip borescope is a versatile inspection camera, engineered to provide excellent performance in all hard to inspect places. Fitted with a waterproof inspection camera that allows image capturing and video recording, stored directly to an SD card (supplied). Being IP67 rated, the camera can operate underwater making it perfectly suited for inspection of pipework, sewage, and mechanical/machine equipment. The super bright 6 LED lights help illuminate even the darkest areas. The flexible, semi-rigid cable bends making it easier to access confined places. Attached with a rechargeable 3.7V li-ion battery and fitted with 5.5mm x 1m of flexible inspection cable with a mirror attachment, an 8GB micro SD memory card and a USB charging lead. Stored in a padded plastic storage case. Designed for use in mechanical, electrical, plumbing, heating and building fields.
