- This heat gun is perfect for traditional purposes (paint and wallpaper stripping, for example) and numerous additional uses – such as thawing frozen pipes
- A must-have tool for the DIY enthusiast, hobbyist and professional tradesperson

DESCRIPTION

The versatility of a heat gun means it's a must-have tool for the DIY enthusiast, hobbyist and professional tradesperson. This Storm Force heat gun is perfect for traditional purposes – stripping paint and wallpaper, welding and bending plastics. It's also great for other uses, such as thawing frozen pipes and getting rid of dents in cars. The heat gun has two heat settings (350 or 550 degrees) and two airflow settings (300 or 500L/min). A resettable thermal cut-out switches off the heat gun if it overheats, and the tool comes with a 2m rubber cable. A four-piece nozzle set is also included, with surface, reflector and concentrator nozzles to enable a range of tasks, including heating paint in a wooden frame while deflecting heat away from the glass.

Manufactured and certified to CE and UKCA
