

# ClimaPilot Plus

Digital hygrometer for precise measurement of relative humidity and ambient temperature, including dew point indication – made from recycled materials for sustainability

This digital hygrometer measures relative humidity, ambient temperature, and displays the calculated dew point. All three values are shown simultaneously on the clear LC display – providing precise information at a glance. The reliable sensor in the probe tip ensures high accuracy and quick response to the climatic conditions at the measuring site. Thanks to its well-thought-out design and separate sensor placement within the housing, it always delivers authentic, unaltered readings. Practical features include the display of minimum and maximum values. The clip holder allows the device to be easily fixed for longer measurements. The energy-saving automatic switch-off can be deactivated for continuous operation. The housing is largely made from recycled material, contributing to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- Compact and handy tool for testing the room climate
- Precise measurement of ambient temperature and humidity by high-quality sensor, including display of calculated dew point
- Simultaneous display of all three values on the easy-to-read LC display
- Fast response to climatic conditions at the measurement site
- Practical display of the lowest or highest measured value

## TECHNICAL DATA

<b>Measured Variable</b>	relative humidity Ambient temperature Dew point temperature
<b>Measuring Range Ambient Temperature</b>	-10°C ... 50°C
<b>Accuracy Ambient Temperature</b>	± 1°C
<b>Measuring Range Humidity (Relative)</b>	0% ... 100%
<b>Accuracy (Absolute) Humidity (Relative)</b>	± 2% (20% ... 80%) ± 3% (<20%, >80%)
<b>Measurement Range Dewpoint Temperature</b>	-10°C ... 50°C
<b>Accuracy Dewpoint Temperature</b>	± 1°C
<b>Power Supply</b>	1 x 1,5V LR03 (AAA)

## SCOPE OF DELIVERY
