FEATURES

- Clamp for strut insert pistons
 - Used to easily lock macpherson struts into a fully extended position
 - Enables road springs to be removed and replaced
 - Especially useful when working on struts equipped with strong internal springs (tension stop springs) which have a tendency to pull the strut shaft into the strut
 - Manufactured from anodised aluminium
-

DESCRIPTION

Used to easily lock Macpherson struts into a fully extended position so the road spring can be removed and replaced. Especially useful when working on struts equipped with strong internal springs (tension stop springs) which have a tendency to pull the strut shaft into the strut. Manufactured from anodised aluminium.
