- forged into a wedge shape
- Wedged demolition face to maximise destructive force and wide flat face for strike accuracy
- Thick handle with rubber overlay
- below the striking head provides
- overstrike protection
- Textured rubber grip for comfortable and secure two-handed operation

DESCRIPTION

This demolition hammer from Estwing has a double-injected shaft reinforced with over 70% fibreglass for increased strength. The induction hardened head is forged into a wedge shape providing maximum destructive force, while the wide flat face enhances strike accuracy. The thick handle has a rubber overlay below the demolition head to provide overstrike protection. Furthermore, the textured rubber grip helps reduce impact vibration and provides a comfortable and secure two-handed operation.

ESTWING sledge hammers and striking tools are manufactured generally in accordance with BS 876
