Pneumatic Brake Fluid Extractor, 1L

STOCK No. 22113 **BRAND** Draper

BARCODE 5059482044304

WARRANTY 6 months parts and labour

FEATURES

- Standard workshop air supply and suitable for one-person operation
- Draws fluid from the bleed nipple without the requirement of specialised brake reservoir caps
- Translucent hose allows for the monitoring of air in the system
- Lockable trigger function
- Bleed nipple connector with storage hook
- Includes spare component kit: 1/4" BSP coupling, hose joiner and bleed nipple connector

DESCRIPTION

For bleeding or undertaking a full brake fluid replacement in cars, vans, trucks and motorbikes, this pneumatic brake fluid extractor uses a standard workshop air supply. It requires simple, one-person operation and is quick, clean and efficient. The extractor draws fluid from the bleed nipple without the requirement of specialised brake reservoir caps and has a translucent hose to allow for the monitoring of air in the system. There is a lockable trigger function, and the extractor is supplied with a spare component kit comprising a nipple connector, joining tube and gasket.

CONTENTS

1 x Reservoir
1 x Nipple connector
1 x Joining tube
1 x Air line coupling
1 x Gasket
1 x Spare component kit: nipple connector, joining tube, gasket

SPECIFICATIONS

Reservoir capacity	1L
Air inlet size	1/4" BSP
Air supply	90-120psi
Average air consumption	180L/min
Max air supply	120psi
Hose length	1.8m
