

Digital Box Level and Angle Gauge

STOCK No. 29098 BRAND Draper

BARCODE 5059482075346

WARRANTY Lifetime

FEATURES

- For measuring and setting angles or checking relative angles with zero calibration feature
- Reverse contrast display improves visibility in low light and auto-rotates when upside down
- Strong magnetic base for hands-free use
- V-groove edges enable optimal alignment on pipework
- Measures between 0-90° or 0-180°
- Supplied with 2 x AAA batteries and protective soft storage pouch

DESCRIPTION

This digital box level and angle gauge can measure or set angles, and check relative angles with its zero calibration feature. The reverse contrast display improves visibility in low light conditions and automatically rotates when upside-down for easy viewing. It is made from robust plastic and has a strong magnetic base to attach to metal surfaces for hands-free use. The V-groove edges enable optimal alignment on conduits and pipes for bending and alignment tasks. It can measure between 0-90 or 0-180 degrees, which is useful when accounting for springback when bending conduit. It comes supplied with 2 x AAA batteries and a protective soft storage pouch.
