- 72-tooth ratchets with easy-to-use reverse lever to change the direction
- Ratchets have quick-release button for rapid locking and release of sockets
- Draper HI-TORQ® sockets deliver optimum leverage with minimal risk of damage
- Wide range of handy screwdriver bits organised in own plastic storage case
- Includes universal joints, extension bars, T-bars, spark plug sockets, spinner handle and more
- Robust case for transportation and storage

DESCRIPTION

This high-quality metric socket set is made from chrome vanadium steel (CR-V) which is correctly hardened and tempered for strength and durability. The components are finished with satin chrome plating for corrosion protection. Manufactured and tested in accordance with valid DIN and ISO standards. The 72-tooth ratchets are equipped with an easy-to-use reverse lever to change the direction. It has a quick-release button to allow the rapid locking and quick release of sockets. Fitted with an ergonomic soft grip handle. The Draper HI-TORQ® sockets deliver optimum leverage with minimal risk of damage. That is because they are engineered to securely grip the flats rather than the corners of the fixings. So, they are less likely to slip and there is less risk of stripping the edges – even if the fixings are already damaged. A wide range of screwdriver bits is organised in its own plastic storage case. The bits are made from high-quality CR-V steel and have a shot blast finish. The set includes many attachments and tools, including universal joints, extension bars and a 1/4" square drive sliding T-bar that enables you to operate effectively in hard-to-reach spaces. A 1/2" square drive T-bar converter can be used with an extension bar to form a sliding T-bar. Plus, there are spark plug sockets, a spinner handle with 1/4" female square drive that can create a T handle with the ratchet for extra leverage, various couplers and more. Supplied in a robust plastic case for ease of transportation and storage.

Product is supplied in brown box.
