FEATURES

- Double-injected fibreglass
- shaft for increased strength, durability and overstrike protection
- Induction hardened
- forged head
- Head design generates greater force for splitting big logs of wood
- Textured rubber overlay on the handle provides a comfortable and secure
- grip, while also helping to dampen vibration

DESCRIPTION

This maul from Estwing has a double-injected shaft reinforced with over 70% fibreglass, providing increased strength, durability and overstrike protection. The induction hardened head is designed to deliver greater force for splitting large logs of wood. The shaft is equipped with a textured rubber overlay, offering a comfortable and secure grip while also dampening vibration. This maul is ideal for cutting lumber, chopping firewood, and trimming, cutting, splitting, and shaping wood.

ESTWING sledge hammers and striking tools are manufactured generally in accordance with BS 876
