DESCRIPTION

The BUNKER 36 inch tool chest and roller cabinet is a robust, professional-grade storage solution designed for garages, workshops, and trade environments. Built for users who demand durability and organisation, this combined unit keeps your tools neatly arranged and accessible whenever you need them.

Working as both a mobile and stationary 36 inch tool chest, it includes 9 spacious drawers in varying sizes - perfect for storing drill bits, torque wrenches, screwdrivers, hammers, sockets, and more. Each drawer features soft-close runners and foam lining to protect tools and minimise noise in busy workspaces.

Finished with an ultra-durable powder-coated surface and black anodised aluminium trim, this tool chest enhances both function and aesthetics. The upper chest opens smoothly on twin gas struts, revealing a soft-lined top tray ideal for frequently used items.

The steel handle and four castor wheels make it easy to move from one space to another, with two of the wheels featuring brakes to lock the unit in place when stationary. For added convenience, the tool chest includes cable access through two rubber grommets. The BUNKER 36" combined roller cabinet and tool chest is available through our network of local and online stockists.

BUNKER items are often sent on pallets. Their high-quality construction means that some products are heavy and will require two people to lift them.
