- 45° and 90° angle guides
- Slip resistant soft grip handle, welded for stability and strength
- Hang hole for easy storage

DESCRIPTION

Expert quality Supercut® handsaw blades are manufactured from 1mm thick T10 high-quality carbon steel, which is hardened and stress relieved to ensure straightness. The tough lacquer coating prevents corrosion and eases friction. The razor-sharp teeth are induction hardened and triple ground to ensure a fast cut on the front and back stroke, plus optimal sawdust removal. There is a 45° and 90° angle guides to assist with marking out the cut. The slip resistant soft grip handle is exclusively designed for Draper, and is ultrasonic welded for stability and strength. Complete with hang hole for easy storage.
