110V Infrared Cabinet Heater, 2.4kW, 8188 BTU

STOCK No. 04746 **BRAND** Draper

BARCODE 5059482053153

WARRANTY 12 months parts and labour

FEATURES

- The heater is designed to be highly efficient and is ideal for both commercial and domestic applications
- The heater has twin ruby halogen elements for maximum heat emission and two powerful heat settings
- The adjustable thermostat control allows settings of 15–45°C, and the heater can be programmed to enter standby mode after a set period
- The heater has a soft-touch electronic control panel with LED display and a safety tilt cut-out switch
- Two of the four multidirectional casters are lockable, and the heater is supplied with a 2m cable and plug

DESCRIPTION

This 2.4kW 110V infrared cabinet heater is highly efficient and converts 95% of the input electricity to heat. It is designed for use in commercial and industrial environments and is the ideal solution for large areas such as warehouses and building sites where heating the entire area is either impractical or too expensive. The heater can be used to provide localised heat for staff or processes such as drying walls, paintwork and plaster. The cabinet is manufactured from powder-coated metal, and the heater has twin ruby halogen elements for maximum heat emission and two powerful heat settings. It can be used with one or both elements activated. When the second element is activated, it will automatically switch off once the ambient temperature is reached, with the adjustable thermostat control allowing settings of 15–45°C. The heater can be programmed to enter standby mode after a set period and comes with a remote control incorporating all the buttons found on the unit interface. The heater has a soft-touch electronic control panel with LED display and a safety tilt cut-out switch. Two of the four multidirectional casters are lockable for additional safety, and the heater comes supplied with a 2m cable and plug.

Manufactured and certified to CE

CONTENTS

1 x 110V Infrared Cabinet Heater, 2.4kW
