FEATURES

- Double-injected fibreglass
- shaft for increased strength, durability and overstrike protection
- Induction hardened
- forged head
- Textured rubber overlay on the handle provides a comfortable and secure grip, while also helping to dampen vibration
- Lanyard hole for convenience

DESCRIPTION

This axe from Estwing has a double-injected shaft reinforced with over 70% fibreglass, providing increased strength, durability and overstrike protection. The drop forged head is induction hardened. The shaft is equipped with a textured rubber overlay, offering a comfortable and secure grip while also dampening vibration. This axe is ideal for cutting lumber, chopping firewood, and trimming, cutting, splitting, and shaping wood. It also has a lanyard hole for convenience.

ESTWING sledge hammers and striking tools are manufactured generally in accordance with BS 876
