Chisel Point Crowbars

BRAND

WARRANTY

FEATURES

- Solid forged EN8D steel construction provides a substantial tool for demanding site work and heavy-duty manual applications
- Hardened chisel and pointed ends (HRC 38–42) provide durable working edges for breaking into hard materials and carrying out levering tasks
- The chisel end features a 60mm angled foot, helping users get underneath paving slabs and other materials for lifting and repositioning
- The tapered point concentrates force into a smaller area, helping penetrate compacted ground and break up stone or concrete
- The ground and polished swan-neck end provides a finished working profile for practical levering applications

DESCRIPTION

A heavy-duty chisel-point crowbar, forged from EN8D high-quality steel, designed for breaking, levering and moving heavy materials. Ideal for builders, groundworkers, demolition work, and construction, it features hardened chisel and pointed ends.
