- Fitted with a twin-piston 'quick lift' facility and a safety overload valve for added user protection
- Operated via a foot pedal for hands-free operation
- Hardwearing nylon wheels help prevent damage to garage floors delivering a quieter and smoother operation
- Side-mounted handles aid positioning and increases manoeuvrability around the workshop or garage
- Reversible saddle accepts a wide variety of gearboxes/components

DESCRIPTION

Hydraulic vertical transmission jack with a telescopic ram. The jack is fitted with a twin-piston 'quick lift' facility and a safety overload valve for added user protection. Operated via a foot pedal for hands-free operation fitted with an anti-slip rubber cover. The hardwearing nylon wheels help prevent damage to garage floors delivering a quieter and smoother operation. The extra-large castors and side-mounted handles aid positioning and increase manoeuvrability around the workshop or garage. The reversible saddle can accept a wide variety of gearboxes/components.
