DESCRIPTION

Introducing the stylishly practical roller cabinet and tool chest from BUNKER. This innovative combination ensures the safe protection and security of your tools while maximising space in your workshop or garage.

The 26" unit features 10 drawers of different sizes, ideal for storing small and large tools however you desire. Manufactured from high-quality steel, the unit is finished with a durable industrial powder coating and black anodised aluminium trim, offering a sleek and modern aesthetic.

Each drawer features a smooth, soft-close operation and is lined with foam to keep your tools protected. The tool chest lid seamlessly lifts open thanks to the two quiet gas struts, and cable access is already built into the tool chest via two rubber grommets. The steel handle is located on the side of the unit, which allows for ease of use, and two of the four castor wheels are fitted with brakes for added convenience.

Our modular storage solutions are designed to revolutionise the way you approach organisation, allowing you to spend less time arranging your tools and more time focusing on your work with the quality tools in your new BUNKER.

Explore our trusted range of online stockists and transform your workspace today - you won't regret it.

BUNKER items are often sent on pallets. Their high-quality construction means that some products are heavy and will require two people to lift them.
