

Flue Kit for Diesel Heater

BRAND

WARRANTY

FEATURES

- Constructed from 304 stainless steel for durability and corrosion resistance
- Includes straight, perforated and 90° elbow sections for flexible installation
- Modular design allows the flue to be configured to suit different layouts

DESCRIPTION

This stainless steel flue kit is designed for safely venting diesel heater exhaust gases in suitable semi-enclosed installations. Constructed from 304 stainless steel, it includes straight, perforated, and 90° elbow sections, a modular design, and is suitable for long-lasting use in demanding environments.

The exhaust flue should always be installed and tested by a suitably qualified person to ensure safe heater operation.
