Infrared Cabinet Heater

BRAND Draper

WARRANTY 12 months

FEATURES

- The heater is designed to be highly efficient and is ideal for both commercial and domestic applications
- The heater has twin ruby halogen elements for maximum heat emission and two powerful heat settings
- The adjustable thermostat control allows settings of 15–45°C, and the heater can be programmed to enter standby mode after a set period
- The heater has a soft-touch electronic control panel with LED display and a safety tilt cut-out switch
- Two of the four multidirectional casters are lockable, and the heater is supplied with a 2m cable and plug

DESCRIPTION

These infrared cabinet heaters are highly efficient and convert 95% of the input electricity to heat. They are designed for use in commercial and industrial environments and are the ideal solution for large areas such as warehouses and building sites where heating the entire area is either impractical or too expensive. The units can be used to provide localised heat for staff or processes such as drying walls, paintwork and plaster. The cabinet is manufactured from powder-coated metal, and the heaters have twin ruby halogen elements for maximum heat emission and two powerful heat settings. They can be used with one or both elements activated. When the second element is activated, it will automatically switch off once the ambient temperature is reached, with the adjustable thermostat control allowing settings of 15–45°C. The heaters can be programmed to enter standby mode after a set period and come with a remote control incorporating all the buttons found on the unit interface. The heaters have a soft-touch electronic control panel with LED display and a safety tilt cut-out switch. Two of the four multidirectional casters are lockable for additional safety, and the heaters come supplied with a 2m cable and plug.

Stock No.	Description	Voltage	Wattage
04746	Space Heater	110V	2.4kW
04745	Space Heater	230V	2.8kW
