

Electrical Disconnect Pliers

STOCK No. 28627 **BRAND** Draper

BARCODE 5059482074912

WARRANTY Lifetime

FEATURES

- Multi-angle access
- Hooked end for easy removal of push tab connectors
- Disconnects without damage
- Serrated tip for enhanced grip
- Non-slip handle grips

DESCRIPTION

These electrical disconnect pliers are designed to easily remove locking push tab electrical connectors found on mass air flow sensors, fuel injectors and various other applications. They are engineered for multi-access use while preventing damage when separating the connector from the sensor. To use the pliers, start by using the hooked end to pull out the push tab. Then, engage the tab with the pointed end, squeeze the tabs together, and lift to detach the connector from the sensor. The serrated tip provides an enhanced grip, while the non-slip handles ensure comfort and control during use.
