

1A 6/12V Smart Battery Charger

BRAND

WARRANTY

FEATURES

- Compatible with flooded, maintenance-free, AGM and gel batteries
 - Smart charging function helps maintain battery condition and lifespan
 - Supports both charging and long-term battery maintenance modes
 - Reverse polarity and short-circuit protection improve user safety
 - IP54 protection rating helps resist dust and water splashes
 - Compact lightweight design suitable for home garages and workshops
 - 1.5m input and output cables provide flexible positioning during use
 - Suitable for batteries from 4Ah to 120Ah capacity
 - Operates in temperatures from -20°C to 40°C for reliable performance
-

DESCRIPTION

Compact smart charger designed to safely charge and maintain 6V and 12V lead-acid batteries. Ideal for car and motorcycle owners, garage workshops, and DIY mechanics, it features a smart charging function that helps maintain battery condition and lifespan.

CE, GS and RoHS approved

CONTENTS

1 x 1A 6/12V Smart Battery Charger

1 x Alligator Clamp

SPECIFICATIONS

Nominal voltage:220V-240V
Battery current: Max.1Amp
Battery Voltage: 6V/12V
input cable length : 1.5m with BS Plug
Output cable length : 1.5m
Surrounding Temperature -20 to 40 ,+€
Protection class IP54
Protection Reverse polarity protection and Short-Circuit Protection
Suitable for 6V/12-volt lead acid battery chemistries including flooded (wet), maintenance-free, AGM and gel cell.
Battery Capacity:
4-30Ah(for charging purpose) ,+€
4-120Ah (for maintaining purpose)
Charging Start Voltage: 5V
