BARCODE 5059482072635

WARRANTY 24 months parts and labour

FEATURES

- Extra-long probe, ideal for use in restricted areas
- Volume control
- Powered by 9V battery (available separately)
- Battery indicator
- Supplied with headphones

DESCRIPTION

This electronic stethoscope is designed to quickly and easily identify the source of automotive noises and vibrations. It is particularly useful for diagnosing issues in engines, gearboxes, and bearings in noisy environments. Featuring an extra-long probe, it is ideal for use in tight spaces. The volume control and headphones provide clear audio results. It operates on a 9V battery (sold separately) and includes a battery indicator that signals when it is time to replace the battery.

CONTENTS

1 x Electronic Stethoscope
