1/4" BSP Combined Filter/Regulator/ Lubricator Unit (FRL)

STOCK No. 24326 **BRAND** Draper

BARCODE 5010559243266

WARRANTY 6 months parts and labour

FEATURES

- 40 micron filter removes moisture and airborne contaminants from compressed air
- Integrated regulator maintains stable air pressure up to 10 bar / 145 PSI
- Built-in lubricator helps extend pneumatic tool and equipment life
- Manual/semi-automatic drain allows easy removal of collected condensate
- Dual-scale pressure gauge marked in PSI and BAR for quick monitoring
- Supplied with wall mounting bracket for secure installation
- Suitable for operating temperatures up to 50°C at maximum pressure

DESCRIPTION

Combined pneumatic air treatment unit for filtering, regulating and lubricating compressed air systems. Ideal for maintenance engineers, workshop technicians, garage operators and pneumatic system users, it features a 40 micron filter, integrated regulator, and a built-in lubricator to extend tool and equipment life.

CONTENTS

1 x 1/4" BSP Combined Filter/Regulator/Lubricator Unit (FRL)

SPECIFICATIONS

Min. flow	0.42cfm / 12 litres per minute
Max. flow	18cfm / 500 litres per minute
