FEATURES

- Three pre-set locking height positions - 635, 755, 865mm
- Rubber topped platform prevents damage and slippage
- Foot operated hydraulic lifting/lowering mechanism
- Removable platform recess to aid gearbox oil draining

DESCRIPTION

This hydraulic motorcycle scissor lift is suitable for lifting lighter motorcycles, mopeds or scooters, sport or dirt bikes up to a weight of 135kg. Designed with the health and safety of the mechanic in mind, the lift can be used by motorcycle enthusiasts and workshop professionals. It has a foot operated lever-style pedal, and the scissor style lifting action is powered by a hydraulic pump. With a minimum height of 340mm, there are four preset locking height positions: 475, 635, 755 and 865mm. A rubber platform mat prevents slippage and damage to the underside of the vehicle while the lift is in operation, and the wide platform ensures secure lifting. The lift also has a recess area within the table to assist with fluid/oil draining.

Manufactured and individually certified to EN 1494

CONTENTS

1 x Hydraulic Motorcycle Scissor Lift, 135kg

SPECIFICATIONS

Capacity	135kg
Minimum height	340mm
Maximum height	870mm
Platform size	410 × 350mm
