DESCRIPTION

The BUNKER modular floor cabinet offers ample storage space for your tools and equipment. It can be used as an individual storage cabinet in conjunction with either a stainless steel or hardwood worktop or as part of the BUNKER modular storage system, which includes many clever modular options.

With two cupboard doors complemented by stylish aluminium handles and an adjustable shelf inside, it offers a more flexible and versatile use of space.

With its striking matt black textured finish, the floor cabinet also features adjustable feet, allowing you to customise the unit for perfect positioning on uneven floors. Furthermore, the integrated lock provides added security, and it comes complete with two keys.

The cabinet arrives fully assembled, so your only challenge will be choosing the perfect spot for installation. All necessary fittings for installation are included. Explore our trusted stockist network and choose BUNKER to turn your vision into a reality.

Some BUNKER products are sent on pallets. Their high quality construction means that some products are heavy and will require two people to lift them. Tools not included.
