FEATURES

- Detects current between 105-250V
- Blade made from chrome plated premium SVCM steel
- LED lights up inside transparent handle to indicate presence of live voltage
- Ergonomic design for comfortable use
- Pocket clip for easy portability

DESCRIPTION

This slotted screwdriver for detecting the presence of current between 105-250V. This screwdriver features a blade made from premium SVCM steel that is chrome plated for maximum durability. The internal LED lights up inside the transparent handle to indicate the presence of a live voltage. Its ergonomic design guarantees that the handle is comfortable to use, and the pocket clip ensures that it can be easily stored and transported.
