- Lifetime Warranty

DESCRIPTION

Expert quality XP1000®, manufactured from premium steel forged in Germany. Induction-hardened jaws provide better gripping performance and an effortless clean cutting edge. The off-centred, precision-machined pivot pins not only allow a smooth one-handed operation with minimum play for ease of use, but also increase the grip when required. Two part bi-material ergonomic soft grip handle allows maximum grip and user comfort, and horns prevent slipping onto live conductors. Tested to 10,000V, these pliers are suitable for working on live circuits of 1,000V AC and 1,500V DC. Maximum cutting capacity: 2.0mm.

Stock No.	Length
94635	180mm
94636	200mm
