FEATURES

- Premium hickory shaft, sanded and lacquered
- Induction hardened
- forged head
- Hickory shaft absorbs shock to minimise fatigue and enhance efficiency
- Machined and polished faces, bevelled to prevent chipping
- Cross pein end for driving small nails and working in hard-to-reach places

DESCRIPTION

This Estwing blacksmith hammer is made from premium hickory imported from the USA. The drop forged head is induction hardened. The faces are machined and polished, bevelled to prevent chipping. There is a cross pein end for driving small nails and working in hard-to-reach places. Hickory serves as a natural shock absorber, intended to minimise user fatigue, reduce vibration, and enhance efficiency. This hammer is for metalworkers, welders and contractors for metalwork and shaping.

ESTWING sledge hammers and striking tools are manufactured generally in accordance with BS 876

CONTENTS
