

SAFETY AT EVERY LEVEL

The Pro 2 by Jackloc: The Jackloc product designed for the trade sector with bulk purchases in mind.

Open windows in buildings can cause fatal accidents from falls. Fitting strong and robust window restrictors helps to provide a safe and secure environment and prevent unnecessary accidents. But we know that budgets can be tight in these environments.

The new Pro 2 by Jackloc has been designed to provide an affordable Jackloc solution for bulk purchases, whilst still retaining the Jackloc quality assurances that come with all of our products.

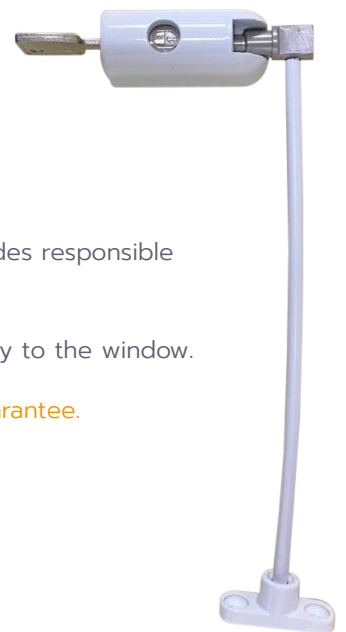

The Pro 2 restrictor is built with Jackloc precision and materials, including the Jackloc zinc coated strength tested cable and grade 2 security screws.

The restrictor body contains a 2-disc locking barrel, an exclusive Jackloc key that provides responsible users the ability to dis-engage the restrictor with a key if required.

Once locked, the security screws are hidden from view, adding extra security and safety to the window.

And as with all Jackloc products, the Pro 2 by Jackloc comes with a Jackloc 10-year guarantee.

The Pro 2 is only available in white and with a 200mm cable.
