

smarter access for **everyone**

Smarter access. Better experiences.

Connect by Codelocks delivers advanced locking solutions designed to meet the demands of modern working environments, while providing the high-quality customer experience today's users expect.

Codelocks electronic locks integrate seamlessly with Codelocks' digital platforms to enable remote management, flexible access control and enhanced operational efficiency.

Convenience, control and more

Codelocks' NetCode® Technology allows you to remotely generate time- and date-sensitive access codes using the Codelocks Connect App or Portal. NetCodes can be shared instantly via SMS or email, making access simple and fully controlled.

For even greater flexibility, Codelocks' Resource Booking solutions support a wide range of self-service applications alongside an Application Programming Interface (API) that enables integration with compatible booking and management platforms. Codelocks' solutions help deliver the frictionless, modern customer experiences today's guests and users expect.

Codelocks NetCode® Technology

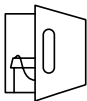

Stay. Greet. Work. Play. Eat.

Complete control, wherever you are.
NetCode® is the smart way to generate
time-sensitive codes for doors and lockers.

Through the Codelocks Connect App and Portal,
you can create codes that have a specified start
date, time and duration that will automatically expire.
Working in harmony with our Codelocks and KitLock
locking solutions, using NetCodes for flexible,
temporary access enables business owners to
reduce overhead costs and facilitate consumer
self-service whilst simultaneously increasing staff
productivity and profits.

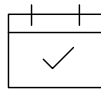

Self-Service

Storage Lockers

Sports Facilities

Holiday Rentals

How it works:

1. Generate
a NetCode® via
the Connect
App or Portal

2. Communicate
and share the
NetCode® via
SMS or email

3. Activate
and ready
to use for
the set time

Generate. Share. Control. **Anywhere.**

Compatible Codelocks Locking Solutions

KitLock by Codelocks

A modern alternative to traditional locks, KitLock provides controlled access to personal lockers, cabinets and storage using a simple code or card. Ideal for offices, co-working spaces, gyms and recreational environments.

KitLock models compatible with Connect by Codelocks also benefit from NetCode® technology, enabling time-sensitive access for enhanced control and flexibility.

KitLock 
by Codelocks

A. CL5500 NetCode®

B. CL5500 NetCode®

C. CL5000 NetCode®

Available Lock Finishes

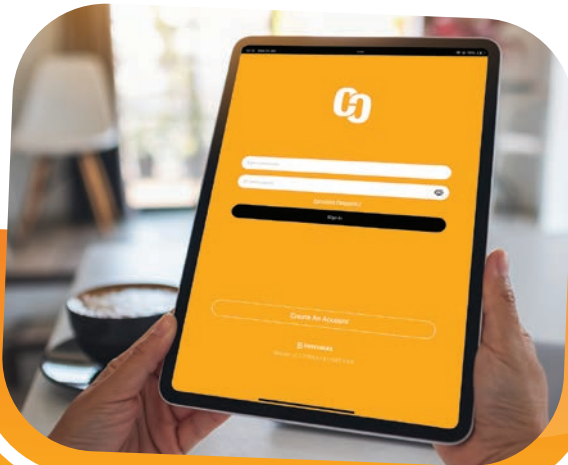

Silver Grey, Silver Chrome, Black, Brushed Steel and Solid Black

Connect by Codelocks

The Connect App and Portal

Register for a New Codelocks Connect Account

Create a Codelocks Connect account via the app or portal. One set of credentials gives you seamless access to both the Codelocks Connect App and the Codelocks Connect Portal - no separate logins required.

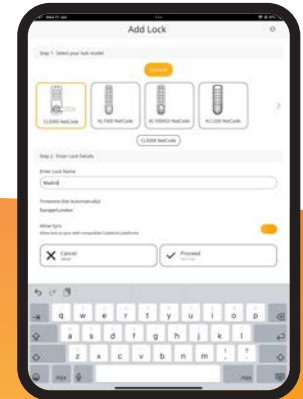

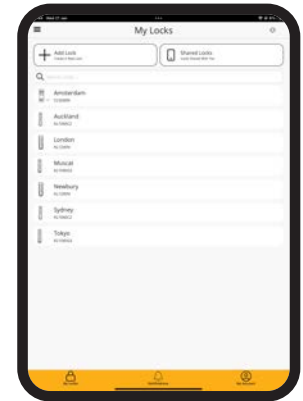

Manage Your NetCode® Enabled Locks from Anywhere

Remotely manage compatible NetCode® enabled locks through the Connect App and Portal. Create, update, and control access codes without needing to be on site, giving you complete flexibility and control wherever you are.

Add New Locks On-the-Go

Quickly add and register Codelocks locks straight from your mobile phone. Ideal for installers and facility managers who need to configure locks while on-site, quickly via their phone.

Generate a NetCode®

Create time-restricted NetCodes for supported locks. NetCodes can be shared with users to provide temporary or scheduled access. Ideal for visiting service engineers, delivery personal and short/medium-term locker rental.

Import Existing Locks from the Connect Portal

Easily import locks already registered in your Codelocks Connect Portal account into the app. This ensures all locks are visible and manageable across both platforms without duplication.

Multiple Lock Managers

Assign multiple managers to a single lock or group of locks. Share management responsibilities securely, ensuring teams can collaborate without relying on a single administrator.

Purchase Credits

Buy credits directly through the app and portal to generate a NetCode®. Credits are instantly applied to your account for uninterrupted service.

Create via SMS

Register known mobile phone numbers to allow the generation of NetCodes by simply sending an SMS message to Codelocks' SMS gateway.

Synchronise with Codelocks Connect Portal

Keep your data perfectly aligned between the app and the portal. Any changes made in the app - such as lock additions, settings updates, or access permissions - are automatically synced, and vice versa.

The Codelocks Connect App and Connect Portal deliver a complete, seamless lock management experience. Whether you're on-the-go using the app or working from your desktop via the portal, you can manage locks, users, and settings with full flexibility and control - wherever you are.

On-the-go **control!**

Codelocks Connect

Developer Programme

The Developer Programme provides access to Codelocks' Application Programming Interface (API); a type of software that establishes an interface between computers. It allows your systems and technologies to talk to Codelocks' platforms, enabling the development of bespoke applications that can make use of Codelocks' NetCode® features. The API provides unrivalled flexibility to develop access control solutions, that work for your business.

A one-off fee is payable as part of the Developer Programme onboarding process, and an active subscription is required for continued use of the API.

Software Development Kits and Managed Support are available as add-on purchases, providing improved time to market and enhanced care throughout a subscription period.

Resource Booking

Available as an extension to the portal, Codelocks Connect Resource Booking is a web-based application that provides a level of self-service to customers, allowing them to make bookings and payments for their chosen events, and instantly receive their NetCode® on-screen as well as confirmed via email.

Advanced **control!**

NetCode® in Action

Real-world examples of smart, self-service access

Codelocks NetCode® Technology is helping organisations across a wide range of sectors deliver flexible and fully automated access.

From community projects and leisure facilities to storage, hospitality, retail and food services, these case studies show how NetCode® enables frictionless customer experiences while reducing operational overheads.

North Devon Hospice - Waggy Tails Meadow

Sector: Community and Leisure

North Devon Hospice uses NetCode® to manage access to its Waggy Tails Meadow dog paddock, creating a fully automated, self-service booking and entry system. Visitors book online and receive time-limited access codes by email, allowing controlled access without the need for staff on site or internet connectivity at the location. The solution has helped generate vital fundraising income while delivering a seamless customer experience.

Cage Riot Studios

Sector: Music and Creative Spaces

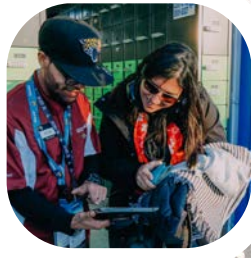

Cage Riot Studios uses NetCode® enabled locks to provide musicians with secure, time-specific access to rehearsal and recording studios. Customers receive unique access codes linked to their booking, allowing fully self-service entry while maintaining high levels of control and auditability. This supports a scalable, staff-free access model and a smooth customer journey.

STOREit Lockers

Sector: Storage and Self-Service

STOREit Lockers implemented KitLock by Codelocks with NetCode® technology to enable customers to book and access lockers independently. Users receive time- and date-sensitive access codes, removing the need for physical keys or on-site staff. The solution supports online booking, automated code delivery and offline operation, making it ideal for high-traffic, self-service environments.

STOREit LOCKERS

SDS London

Sector: Commercial and Self-Service Access

SDS London uses NetCode® technology to deliver secure, automated access as part of a modern, self-service operation. By issuing time-limited access codes remotely, SDS London can manage access efficiently while improving convenience for customers and reducing the need for manual key or staff management.

YummyBox® clevtech

Sector: Food and Retail

YummyBox uses NetCode® to support self-service access to food and retail services. Time-sensitive access codes enable customers to collect orders or access facilities at designated times, helping to streamline operations, improve customer experience and maintain high levels of control without on-site staffing.
