

BELLPROX

STAND ALONE READER & FOBS

It is common for a door entry telephone system to be combined with a proximity access system to allow free access for residents, tenants and staff. The inclusion of a compact standalone proximity reader on the entrance panel allow authorised personnel entry to the building by means of a key-fob. Visitors' access is controlled by the telephone entry system. This proximity access system is an ideal solution where no central programming or reporting is required. The BPR Compact Proximity Reader is a complete panel-mount reader based on the Mifare 13.56MHz tag technology with up to 1000 fob-users.
